PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience delivering full-stack, cloud-native applications using C#, ASP.NET Core, React/TypeScript, and SQL Server on Microsoft Azure. Proven record across the complete software development lifecycle—requirements gathering, design, development, testing, CI/CD deployment, and production support. Skilled in microservices architecture, RESTful API development, application modernization, and automated testing. Committed to clean, maintainable code, collaborative code reviews, and continuous learning. Actively exploring Microsoft Power Platform (Power Apps, Power Automate, Power Pages) as a complementary low-code skillset to deliver governed, scalable solutions aligned with enterprise architecture.

CORE COMPETENCIES

C# • ASP.NET Core • JavaScript / TypeScript • React • SQL Server • Microsoft Azure • RESTful APIs • Microservices • Git • CI/CD Pipelines • Docker • Azure DevOps • Full-Stack Development • Unit & Integration Testing • Application Modernization • Agile / Scrum • Microsoft Power Platform (Exploring)

WORK EXPERIENCE

Software Engineer - Marsh & McLennan

Aug 2024 - Present

- Contributed to the full software development lifecycle of a cloud-native Risk Analytics and Insurance Claims Optimization platform spanning design, development, testing, and deployment.
- Designed and implemented backend microservices using C# and ASP.NET Core with SQL Server for policy validation, claims processing, and real-time risk scoring.
- Built and maintained CI/CD pipelines using Docker and Azure DevOps Pipelines, reducing deployment time by 35% and enabling reliable, repeatable automated deployments.
- Managed cloud infrastructure on Microsoft Azure using Azure Container Apps / AKS, Azure Functions, and ARM Templates / Bicep.
- Integrated Apache Kafka for asynchronous, event-driven communication between distributed microservices.
- Implemented secure data access patterns using IAM, encryption at rest, and role-based authorization (RBAC) to satisfy HIPAA and SOX compliance requirements.
- Developed unit and integration tests using xUnit and Moq, achieving 85% automated test coverage.
- Established monitoring, logging, and alerting via Azure Monitor / Application Insights to proactively detect and resolve incidents, supporting application health and reliability.

Software Engineer - NCR Corporation (NCR Voyix)

Jan 2022 - Jul 2023

- Participated in full-stack development efforts to modernize the Aloha Cloud hospitality platform, delivering enhancements across UI, API, and database layers in an Agile/Scrum environment.
- Migrated legacy Ext JS and C# ASP.NET systems to modern React with TypeScript and ASP.NET Core services, improving application performance and scalability by 50%.
- Developed reusable React components and API-first backend services to improve UI consistency and enable third-party integrations.
- Optimized SQL Server queries and LINQ-based data access patterns, reducing data retrieval latency by 50%.
- Implemented comprehensive test coverage using Jest (unit) and Playwright (E2E), achieving 80%+ coverage and reducing UI bugs by 60%.
- Actively participated in code reviews, sprint planning, root cause analysis, and production releases; contributed to documentation and team knowledge sharing.

Web Development Intern - The Sparks Foundation

Nov 2020 - Dec 2020

- Developed a responsive web banking application using JavaScript, HTML, and CSS with secure fund transfer and balance inquiry features; deployed via GitHub Pages.
- Maintained clean commit history and version control best practices using Git throughout the project lifecycle.

EDUCATION

Master of Science in Computer Science

2023 - 2025

University of Central Missouri

Bachelor of Technology in Computer Science

Specialization: Data Science & AI • 2018 - 2022

KL University, India

CERTIFICATIONS

Get Into Energy - Energy Industry Fundamentals 2.0

February 2026

Center for Energy Workforce Development (CEWD)

Industry-recognized credential covering electric and natural gas utility operations.

PROJECTS

Emotion-Based Content Recommendation Web Application | CNN, FER2013, Python

- Designed and implemented an end-to-end web application using a CNN fine-tuned on the FER2013 dataset for real-time facial emotion detection via camera capture, dynamically routing users to personalized Spotify and YouTube content.

Multi-Agent AI Bedtime Story Generator | GPT-3.5-turbo, LLMs, Prompt Engineering

- Built a multi-agent AI system to generate age-appropriate children's bedtime stories (ages 5-10); orchestrated autonomous agents across planning, generation, evaluation, and refinement roles using GPT-3.5-turbo with safety-filtered output.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, Python, C++

Frontend: React, Redux, TypeScript, HTML, CSS, Responsive Design

Backend: ASP.NET Core Web API, .NET 8+, Node.js, REST APIs, Microservices, API Versioning

Databases: SQL Server, Azure SQL, Amazon RDS, DynamoDB, Cosmos DB, Query Optimization

Cloud: Azure Container Apps / AKS, Azure Functions, Azure SQL, Cosmos DB, Azure Monitor, Application Insights, ARM Templates / Bicep

DevOps & Testing: Docker, CI/CD Pipelines, Azure DevOps Pipelines, Git, xUnit, Moq, Jest, Playwright, Automated Testing, Monitoring & Logging

Power Platform: Microsoft Power Apps, Power Automate, Power Pages (Actively Learning - Interest in governed low-code development / CoE standards)

Practices: Agile / Scrum, TDD, Clean Code, Full SDLC, Code Reviews, Root Cause Analysis, Documentation

AI / ML: Machine Learning, Deep Learning, CNNs, LLMs, Multi-Agent Systems, Prompt Engineering, Model Fine-Tuning, ONNX Runtime, NumPy, Pandas.
